

Storage Charges – Vehicle Diagnosis and Repairs

Storage

Upon notification that a vehicle is ready for collection, that vehicle should be collected within 48 hours.

Vehicles that aren't collected within this time frame will accumulate storage charges in line with The Removal, Storage and Disposal of Vehicles (Prescribed Sums and Charges) Regulations 2008. In brief, these are 2 wheeled vehicles £10 per day, 4 wheeled vehicles up to 3500 kg £20 per day, 4 wheeled vehicles 3500 to 7500 kg £25 per day. These charges will be added to the invoice amount at the point of collection.

Disposal of Uncollected Vehicles

Furthermore, should the vehicle remain uncollected for a period of 4 weeks after the notice of collection, we will execute our option to dispose of the vehicle to the highest bidder under our right of Lien. Monies generated by the disposal will be used to settle the invoice and storage charges, with the balance being returned to the owner. Should the disposal not settle the amount owing, we shall have the option to pursue the owner for the balance.

Should the vehicle fail to attract bids, we shall execute our option to scrap the vehicle. This option will attract charges in line with The Removal, Storage and Disposal of Vehicles (Prescribed Sums and Charges) Regulations 2008. In brief, these are 2 wheeled vehicles £50, 4 wheeled vehicles up to 3500 kg £75, 4 wheeled vehicles 3500 to 7500 kg £100. These charges will be added to the invoice amount. In this case we shall have the option to pursue the owner for the invoice amount, additional storage fees and scrappage fee
